

Using Ed-Tech Stimulus Funds to Stimulate Achievement

Focus funds on short-term investments with the potential for long-term benefits

MediaCAST enables school districts to implement 21st century classrooms using innovative strategies that enhance instruction, facilitate teaching and learning, and improve student achievement

Touch the full-spectrum of students and staff to maximize achievement and the return-on-investment of stimulus funds

Drive Results for Students

MediaCAST increases accessibility to visual instruction and media-rich distance learning for the full-spectrum of students. You can individualize visual learning for special needs students and provide ongoing, intensive, high-quality professional development.

Increase Capacity

For long-term sustainable improvement, *MediaCAST* is a visual learning system built on a non-proprietary, open, future-proof platform. *MediaCAST* effectively lengthens the school day by providing 24/7 access to class work.

Accelerate Reform

MediaCAST allows you to integrate technology into the curriculum, implement research-based practices that enhance teaching and learning and facilitate instruction that will help students meet challenging academic achievement standards.

Improve productivity

Increase teacher effectiveness and address inequities in the distribution of effective teachers. Use *MediaCAST* to broadcast the best teachers and curriculum. Use it to collect, manage and analyze data to track student progress and to foster interaction.

Foster Continuous Improvement

Measure and track implementation and results and promote feedback using interactive visual communications tools. Involve parents and service providers in a unified effort to foster assessment, achievement and education reform.

MediaCAST Video on-demand, live broadcasting, digital TV channels, digital signage and interactive videoconferencing integrated into one web interface that makes it easy for instructors to work with video and engage students.
