

Guide Browser Application

Filtering application for iPhone, iPad, and iPod touch devices

An innovative new feature in **Lightspeed Web Access Manager** and **Total Traffic Control**

Extends policies and protection with flexible filtering for iPhone, iPad, and iPod touch devices

Mobile devices, such as iPad™, iPhone®, and iPod touch® devices, can be powerful tools for engaging students in dynamic, interactive learning. But use of mobile devices can expose both the user and the technology to harmful content and safety and security risks. The Lightspeed Guide Browser application can be used in conjunction with Lightspeed Web Access Manager or Total Traffic Control to extend mobile filtering and policies to these devices—helping to ensure the safety of your users, the security of your technology, and the success of your mobile learning initiatives.

BENEFITS

Extends policies and protection to mobile devices.

Your Acceptable Use Policies protect both your users and your equipment. iPad, iPhone, and iPod touch devices are often free from the content filtering used within the network, opening users up to inappropriate content and equipment to dangerous web sites. The Guide Browser application delivers flexible filtering for these mobile devices, ensuring that your filtering policies are applied to your mobile users.

Keeps users safe with comprehensive filtering.

The Guide Browser application detects and/or blocks access to inappropriate material on the Internet based on our extensive, education-specific URL database, as well as your own custom allow and block lists.

Reduces the cost, time, and frustration of compromised computers. By blocking sites known as threats for spyware, malware, and viruses, the Guide Browser application helps keep your mobile Apple devices secure and safe when they are off the network, helping to keep school resources clean and functioning properly.

FEATURES

- Comprehensive CIPA-compliant Internet filtering
- Thumbnail image blocking
- Ability to block all forms of proxy servers (anonymous and secure)
- Forced SafeSearch for Google and Yahoo search engines
- Local policy control (integrates with Active Directory, LDAP, and Open Directory)
- Reporting of on- and off-network activity, including blocked URLs, blocked URLs by category, search engine queries, unknown URLs, and URLs visited
- Extension of user access policies to off-network devices
- Support from any location, with any type of Internet connection, without the need for a virtual private network (VPN)

How the Guide Browser Application Works

To use the Lightspeed Guide Browser on an iPad, iPhone, or iPod touch, students login with their school network credentials. The browser transmits URL requests to the local Lightspeed server. In turn, the Lightspeed server, which checks the request against its content database, either allows it to be processed or sends a blocking and redirect message to the user. The application enables schools to enforce Acceptable Use Policies consistently, protecting users on and off the school network.

The Lightspeed Guide Browser app is available for free download from the iTunes App Store. If you choose to deploy it en masse, contact Sales to extend your license's seat count.

Network Solutions for Safe Online Learning

Software solutions

Manage your school network with our all-in-one solution or its components:

Lightspeed **Total Traffic Control**

Filter, secure, manage, and monitor with a single solution.

Lightspeed **Web Access Manager**

Ensure safe web browsing with customizable filtering and features for safe Web 2.0 access.

Lightspeed **Email Manager**

Archive and report on communications, while blocking spam.

Lightspeed **Security Manager**

Block viruses, spyware, and malware with desktop and gateway security.

Lightspeed **Network Traffic Manager**

Control traffic with bandwidth management.

Lightspeed **Power Manager**

Manage energy use with automated power management.

The Guide Browser application works in conjunction with Web Access Manager and Total Traffic Control.

High-capacity network solutions

High-performance, scalable appliance-based school network solutions:

Lightspeed Rocket Web Access Manager

Ensure safe web browsing on your high-capacity network with comprehensive, customizable filtering and features for safe Web 2.0 access.

Lightspeed Rocket Email Manager

Efficiently block spam on your high-capacity network, while archiving and reporting on communications.

Customize your high-capacity network solution with the addition of our other software products.

Get a comprehensive, cost-saving solution for your high-capacity network by combining the two Rocket appliances with Security Manager, Network Traffic Manager, and Power Manager.

About Lightspeed Systems

Lightspeed Systems Inc., founded in 2000, develops comprehensive network security and management solutions for the education market. We are committed to helping schools operate their networks effectively and efficiently, so educators can provide safe online teaching and learning environments.

Exceptional Service and Support

Our unparalleled service and support mean our solutions will continue to deliver, long after their easy implementation. With any Lightspeed Systems solution, you can depend on:

- 24/7 live-person phone technical support.
- Comprehensive online knowledge bases.
- The Lightspeed Wiki, rife with user collaboration and product expertise.

Professional Development & Training

Professional Services: We provide customized, collaborative professional development services to address your specific needs. For more information, please contact ps@lightspeedsystems.com

Training: To help you fully leverage your investment in Lightspeed Systems solutions, we offer an array of training options.

- Online introductory training and user demonstration videos.
- Administrator certification.
- Regional training throughout the U.S.
